

Musaad Muhammad

Design Engineer · Front-End & UI

musaad.sharikh@gmail.com · [LinkedIn](#) · [GitHub](#)

SUMMARY

I'm a UI designer who learned to build what I design. After seven years designing web interfaces, I now write the front-end too — HTML, CSS, and JavaScript — so I can take a screen from a Figma file all the way to a working page. I'm most useful where design and front-end meet: component libraries, prototypes, and clean hand-offs.

EXPERIENCE

UX/UI Designer — aDawliah

2019 – 2024

- Designed 70+ screens and wireframes in Figma for e-commerce and dashboard products, and wrote the specs engineers built from.
- Built the team's first shared component library in Figma, which cut design-to-dev revision cycles by about 30%.
- Worked directly with front-end engineers to turn wireframes into working prototypes.

Freelance UI Designer & Front-End

2017 – 2019

- Took 5+ small-business and startup projects from first brief to a live site, handling both the design and the build.
- Hand-coded responsive layouts in HTML and CSS, and shipped each one inside a two-week window.

PROJECTS

- E-Commerce UI** — A full shopping flow designed in Figma, 30+ screens from browsing to checkout.
- Portfolio Site** — Built with HTML, CSS, and JavaScript, and deployed on GitHub Pages.

LANGUAGES & TECHNOLOGIES

Front-End: HTML5, CSS3, JavaScript (ES6+), Responsive Web Design, Git & GitHub

Design & Systems: Figma, Auto Layout, Design Systems, Wireframing, Prototyping, User Research, Accessibility (WCAG)

Tools: VS Code, Chrome DevTools

CERTIFICATIONS

- Programming with JavaScript — Meta (Coursera, 2025)
- JavaScript 101 — Tuwaiq Academy, Sater Platform (2025)
- Responsive Web Design — freeCodeCamp (2024)
- UX Design — Interaction Design Foundation (2024)

LANGUAGES

Arabic (native) · English (professional working proficiency — STEP 66, Qiyas 2022)
